The book has an active table of contents for readers to access each chapter directly.

Marx and Engels presented an analytical approach to the class struggle and the problems of capitalism in the book, The Communist Manifesto. The book also contains their ideas for how the capitalist society of the time would be replaced by socialism, and then eventually communism. However, the book is lack of detailed potential future forms of communism.

It was Lenin who took the theories of The Communist Manifesto to the next level for delivery and implementation of a truly socialistic country.

Marx's thought and Lenin's path of building Soviets to address issues of Capitalism were catastrophic to the world. An estimated 70 million people died under the soviet regime. The human cost paid for his theory was enormous. Yet despite all this, Marx's thought is still worshipped by millions by other countries including North Korea and the aged followers in China today.

All of the essential predications by Marx in the work about world moving direction failed. However, history is a mirror for us. Reading the book, The Communist Manifesto, we can have a second thought on evolution of our social systems and avoid paying human cost we made in the past by socialistic countries including Soviets and China.

This is a must-read book to understand the foundational thought of a communist party and the nature of a socialistic country.
