50 fascinating facts about the great pyramid tells us some of the things that mathematicians and engineers know about it that we rarely ever hear. We see how the Great Pyramid gives us accurate inter-stellar data, measures the moon and earth with great precision and that its construction techniques are unprecedented and irreplicable.

The facts in this book were discovered by experts and then discounted by Egyptologists. After all, why would fascinating mathematical and astronomical relationships, thousands of years ahead of their time, be more interesting than the myths that keep them in business, digging through African dirt?

This book may not change your wonder at the Great Pyramid's magnificence but after you read it, you will be sure that it was never designed as a tomb.
