## **Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages** Marcus Wohlsen

Bill Gates recently told Wired that if he were a teenager today, he would be hacking biology. "If you want to change the world in some big way," he says, "that's where you should start-biological molecules."

The most disruptive force on the planet resides in DNA. Biotech companies and academic researchers are just beginning to unlock the potential of piecing together life from scratch. Champions of synthetic biology believe that turning genetic code into Lego-like blocks to build never-before-seen organisms could solve the thorniest challenges in medicine, energy, and environmental protection. But as the hackers who cracked open the potential of the personal computer and the Internet proved, the most revolutionary discoveries often emerge from out-of-the-way places, forged by brilliant outsiders with few resources besides boundless energy and great ideas.

In *Biopunk*, Marcus Wohlsen chronicles a growing community of DIY scientists working outside the walls of corporations and universities who are committed to democratizing DNA the way the Internet did information. The "biohacking" movement, now in its early, heady days, aims to unleash an outbreak of genetically modified innovation by making the tools and techniques of biotechnology accessible to everyone. Borrowing their idealism from the worlds of open-source software, artisanal food, Internet startups, and the Peace Corps, biopunks are devoted advocates for open-sourcing the basic code of life. They believe in the power of individuals with access to DNA to solve the world's biggest problems.

You'll meet a new breed of hackers who aren't afraid to get their hands wet, from entrepreneurs who aim to bring DNA-based medical tools to the poorest of the poor to a curious tinkerer who believes a tub of yogurt and a jellyfish gene could protect the world's food supply. These biohackers include:

- A duo who started a cancer drug company in their kitchen
- A team who built an open-source DNA copy machine
- A woman who developed a genetic test in her apartment for a deadly disease that had stricken her family

Along with the potential of citizen science to bring about disruptive change, Wohlsen explores the risks of DIY bioterrorism, the possibility of genetic engineering experiments gone awry, and whether the ability to design life from scratch on a laptop might come sooner than we think.

### **From reader reviews:**

#### **Nicolas Jones:**

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each publication has different aim or perhaps goal; it means that book has different type. Some people feel enjoy to spend their time and energy to read a book. They are reading whatever they take because their hobby is usually reading a book. Think about the person who don't like studying a book? Sometime, particular person feel need book once they found difficult problem or maybe exercise. Well, probably you will want this Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages.

#### **Clifford Roselli:**

Nowadays reading books become more than want or need but also work as a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book which improve your knowledge and information. The data you get based on what kind of book you read, if you want have more knowledge just go with education books but if you want really feel happy read one with theme for entertaining such as comic or novel. The actual Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages is kind of publication which is giving the reader erratic experience.

#### **Sharon Wilson:**

Reading a reserve can be one of a lot of task that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new details. When you read a reserve you will get new information due to the fact book is one of a number of ways to share the information or maybe their idea. Second, reading a book will make anyone more imaginative. When you studying a book especially fictional works book the author will bring one to imagine the story how the personas do it anything. Third, you are able to share your knowledge to some others. When you read this Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages, you may tells your family, friends as well as soon about yours reserve. Your knowledge can inspire others, make them reading a e-book.

#### **Lola Kelly:**

The reserve with title Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages has a lot of information that you can discover it. You can get a lot of gain after read this book. This specific book exist new understanding the information that exist in this book represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This particular book will bring you inside new era of the syndication. You can read the e-book in your smart phone, so you can read the item anywhere you want.
