From Memex To Hypertext: Vannevar Bush and the Mind's Machine James M. Nyce, Paul Kahn
Vannevar Bush, the engineer who designed the world's most powerful analog computer, predicted the development of a new kind of computing machine he called Memex. For many computer and information scientists, Bush's Memex has been the prototype for a machine to help people think. This book contains Bush's essays, and original essays by academic and commercial researchers relating the state of art in personal computing, hypertext and information retrieval software to bush's ideas and Memex.
