Automorphisms in Birational and Affine Geometry: Levico Terme, Italy, October 2012 (Springer Proceedings in Mathematics & Statistics)

The main focus of this volume is on the problem of describing the automorphism groups of affine and projective varieties, a classical subject in algebraic geometry where, in both cases, the automorphism group is often infinite dimensional. The collection covers a wide range of topics and is intended for researchers in the fields of classical algebraic geometry and birational geometry (Cremona groups) as well as affine geometry with an emphasis on algebraic group actions and automorphism groups. It presents original research and surveys and provides a valuable overview of the current state of the art in these topics.

Bringing together specialists from projective, birational algebraic geometry and affine and complex algebraic geometry, including Mori theory and algebraic group actions, this book is the result of ensuing talks and discussions from the conference “Groups of Automorphisms in Birational and Affine Geometry” held in October 2012, at the CIRM, Levico Terme, Italy. The talks at the conference highlighted the close connections between the above-mentioned areas and promoted the exchange of knowledge and methods from adjacent fields.

From reader reviews:

Kathy Hunnicutt:

Hey guys, do you desire to find a new book to see? Maybe the book with the concept Automorphisms in Birational and Affine Geometry: Levico Terme, Italy, October 2012 (Springer Proceedings in Mathematics & Statistics) suitable to you? The particular book was written by famous writer in this era. The book titled Automorphisms in Birational and Affine Geometry: Levico Terme, Italy, October 2012 (Springer Proceedings in Mathematics & Statistics) is the one of several books in which everyone reads now. That book was inspired a number of people in the world. When you read this book you will enter the new age that you ever knew just before. The author explained their plan in the simple way, thus all of people can easily comprehend the core of this reserve. This book will give you a wide range of information about this world now. To help you see the represented of the world with this book.

Sonia Shipley:

Are you kind of stressful person, only have 10 or maybe 15 minutes in your time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are receiving problem with the book compared to can satisfy your short time to read it because all of this time you only find reserve that need more time to be examined. Automorphisms in Birational and Affine Geometry: Levico Terme, Italy, October 2012 (Springer Proceedings in Mathematics & Statistics) can be your answer as it can be read by you who have those short time problems.

Roger Patrick:

Reading a book being new life style in this yr; every people loves to study a book. When you learn a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information on it. The information that you will get depends on what types of book that you have read. In order to get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such as novel, comics, along with soon. The Automorphisms in Birational and Affine Geometry: Levico Terme, Italy, October 2012 (Springer Proceedings in Mathematics & Statistics) will give you a new experience in studying a book.

Pearl Miller:

A lot of book has printed but it differs. You can get it by internet on social media. You can choose the top book for you, science, comedy, novel, or whatever simply by searching from it. It is known as of book Automorphisms in Birational and Affine Geometry: Levico Terme, Italy, October 2012 (Springer Proceedings in Mathematics & Statistics). You can add your knowledge by it. Without causing the printed book, it might add your knowledge and make anyone happier to read. It is most essential that, you must aware about book. It can bring you from one spot to other place.
