Oxford Handbook of Clinical Geropsychology (Oxford Library of Psychology)

Oxford Handbook of Clinical Geropsychology (Oxford Library of Psychology)

Throughout the world, the population of older adults continues to grow. The rise in geriatric populations has seen an increase in research on clinical diagnostic, assessment, and treatment issues aimed at this population. Clinical geropsychologists have increased their interest both in providing mental health services as well as developing approaches to improve quality of life for all older adults.

The Oxford Handbook of Clinical Geropsychology is a landmark publication in this field, providing broad and authoritative coverage of the research and practice issues in clinical geropsychology today, as well as innovations expanding the field's horizons. Comprising chapters from the foremost scholars in clinical geropsychology from around the world, the handbook captures the global proliferation of activity in this field.

In addition to core sections on topics such as sources of psychological distress, assessment, diagnosis, and intervention, the handbook includes valuable chapters devoted to methodological issues such as longitudinal studies and meta-analyses in the field, as well as new and emerging issues such as technological innovations and social media use in older populations. Each chapter offers a review of the most pertinent international literature, outlining current issues as well as important cultural implications and key practice issues where relevant, and identifying possibilities for future research and policy applications.

The book is essential to all psychology researchers, practitioners, educators, and students with an interest in the mental health of older adults. In addition, health professionals - including psychiatrists, social workers, mental health nurses, and trainee geriatric mental health workers - will find this an invaluable resource.

Older adults comprise a growing percentage of the population worldwide. Clinical psychologists with an interest in older populations have increased the amount of research and applied knowledge about effectively improving mental health later in life, and this book captures that information on an international level. The book addresses how to diagnose, assess and treat mental illness in older persons, as well as ways to improve quality of life in all older persons. It has a great breadth of coverage of the area, including chapters spanning how research is conducted to how new technologies such as virtual reality and social media are used with older people to improve mental health. The book would appeal to all psychology researchers, practitioners, educators and students with an interest in the mental health of older adults. It would also appeal to other

health professionals, including psychiatrists, social workers, and mental health nurses who work with older people. It is a valuable resource for trainee geriatric mental health workers because it highlights key readings and important practice implications in the field.
