Principles of Heating, Ventilation, and Air Conditioning in Buildings

John W. Mitchell, James E. Braun

Principles of Heating, Ventilation, and Air Conditioning in Buildings John W. Mitchell, James E. Braun
Heating Ventilation and Air Conditioning by J. W. Mitchell and J. E. Braun provides foundational knowledge for the behavior and analysis of HVAC systems and related devices. The emphasis of this text is on the application of engineering principles that features tight integration of physical descriptions with a software program that allows performance to be directly calculated, with results that provide insight into actual behavior. Furthermore, the text offers more examples, end-of-chapter problems, and design projects that represent situations an engineer might face in practice and are selected to illustrate the complex and integrated nature of an HVAC system or piece of equipment.
