## The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems

Answering the need to facilitate quantum-chemical calculations of systems with thousands of atoms, Kazuo Kitaura and his coworkers developed the Fragment Molecular Orbital (FMO) method in 1999. Today, the FMO method can be applied to the study of whole proteins and protein–ligand interactions, and is extremely effective in calculating the properties of biological systems and molecular clusters.

Providing a unique and accessible approach, *The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems* is for those researchers eager to obtain useful information from electronic structure calculations of large systems, and for those who wish to know what can be elucidated with the calculations at present and in the near future. The text emphasizes the practical aspects, with as little mathematical detail as possible and in language that is easy to understand.

The free modeling software Facio, in which FMO-related functions are implemented, is provided on the accompanying CD-ROM, which also provides input file samples, usage hints, annotated output from typical calculations, easy-to-follow tutorial material, and AppliGuide movies that show the sequence of mouse operations for data processing.

The book encourages readers to perform their own calculations ? describing the features of the freely available FMO programs (GAMESS and ABINIT-MP) and reviewing many successful applications of the FMO method to practical problems. Filled with practical advice from the inventors of the method and from world-renowned contributors, this reference provides general scientists with the foundation required to use FMO computational methods in a wide range of biomolecular applications, including drug design, protein–ligand binding, enzyme reactivity, and light-driven processes.

Developers interested in extending FMO capabilities or in advancing their own methods will find sufficient information and mathematical detail to encourage method development.

### **From reader reviews:**

#### **Alison Caulfield:**

Reading a guide tends to be new life style on this era globalization. With studying you can get a lot of information that will give you benefit in your life. Having book everyone in this world can share their idea. Books can also inspire a lot of people. Plenty of author can inspire their reader with their story or maybe their experience. Not only the storyplot that share in the books. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some exploration before they write to their book. One of them is this The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems.

#### **Rebecca Bailey:**

A lot of people always spent their free time to vacation or perhaps go to the outside with them family or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent the entire day to reading a guide. The book The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems it is rather good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. When you did not have enough space to create this book you can buy often the e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not to fund but this book provides high quality.

#### **Ruth Goodrich:**

Reading can called head hangout, why? Because when you are reading a book particularly book entitled The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems your brain will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will become your mind friends. Imaging just about every word written in a book then become one form conclusion and explanation in which maybe you never get before. The The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems giving you another experience more than blown away your thoughts but also giving you useful facts for your better life with this era. So now let us demonstrate the relaxing pattern is your body and mind are going to be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary shelling out spare time activity?

#### **Opal Moffett:**

Is it an individual who having spare time subsequently spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This The Fragment Molecular Orbital Method: Practical Applications to Large Molecular Systems can be the solution, oh how comes? It's a

book you know. You are thus out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these textbooks have than the others?
